Cessation of Analyses for Three Volatile Organic Compounds Monitored Pursuant to the National Pollutant Discharge Elimination System Federal Facility Compliance Agreement

J. M. Kersh, Associate General Manager
Environment and Waste Management
EG&G Rocky Flats, Inc.

Recently, we requested that the U.S. Environmental Protection Agency (EPA) review the discharge monitoring requirements imposed on Rocky Flats via the National Pollutant Discharge Elimination System Federal Facility Compliance Agreement (NPDES FFCA). In part, we requested that a requirement for sampling and analysis for three volatile organic compounds (VOCs) at the sewage treatment plant be removed. The three compounds in question are acrolein, acrylonitrile and 2-chloroethylvinyl ether.

EPA has concurred with our request to delete sampling for these three VOCs; a copy of their response is attached. EG&G is hereby authorized to discontinue sampling for these compounds for future NPDES FFCA compliance sampling.

If you have any questions in this matter, please contact Tom Lukow of my staff at extension 4561.
